DETAILED ACTION

Priority

1. Acknowledgment is made of the English translation filed 9/9/03.

Drawings

2. The drawings were received on 9/9/03. These drawings are approved.

Amendments

3. Acknowledgment is made of the amendment filed 9/9/03.

Claim Objections

4. Claim 1 is objected to because of the following informalities: Line 14 recites "accordance the travel-course" which should read "accordance with the travel-course".
Appropriate correction is required.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 11, 12, 17, 19, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Eriksson et al. (US 5,786,787 A).

Eriksson et al. discloses a method of sensing a vehicle driving ahead by means of a yaw sensor and proximity sensor 4 (or radar) for calculating a travel-course offset of the preceding vehicle 25 relative to the host vehicle 23 by means of measuring distance over a time period (or time lag) for determining a velocity during a curve 22 in the road, Eriksson et al. further recites the sensing system for use with Adaptive cruise controls for adjusting the closing speed of the host vehicle in response to the calculated results, as shown in figure 1 and recited in column 3, line 63 through column 4, line 48 and in column 6, lines 1-9.

With respect to claim 12, the half the distance between the tow vehicle a/2 can be used as the measuring distance, as recited in column 4, lines 32-35.

With respect to claim 17, the detection system can detect vehicles in adjacent lanes, as shown in figure 1.

With respect to claims 19 and 20, Eriksson et al. discloses a number of possible detection devices to be used in column 6, lines 11-17.

Allowable subject matter
6. Claims 13-16, 18, and 21-30 are objected to as being dependent on a rejected claim.
Response to Arguments

7. Applicant's arguments with respect to claims 11-30 have been considered but are moot in view of the new ground(s) of rejection.

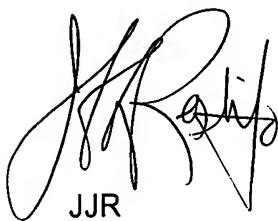

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Joyce et al., Ibrahim, and Steinle et al. all disclose vehicle navigation systems of interest.
